

COLA

Covered outdoor learning areas provide an all weather solution and protection from the sun's harmful UV rays. They provide a cost effective solution allowing schools and facilities to increase their teaching or play space areas.

Cola structures feature wide spans and column spacings making them perfect to cover large areas such as basketball and tennis courts. Design elements include curved or gable roof lines, roof overhangs, varying heights, end and side screening and even colour options.

Typical applications:

School outdoor areas, basketball court covers and sporting facilities

Key design advantages:

Covers large spans cost effectively and provides a permanent waterproof solution

Commercial Shade Solutions

Operating since the early 1950s, Weathersafe has grown to become the leading provider of commercial outdoor shade and shelter solutions. From large span fabric structures and hard roof outdoor learning areas to bespoke retractable roofs we've got you covered. We are experts in tensile membrane architecture and all weather outdoor protection.

We custom design, engineer, manufacture, install and maintain premium all weather structures, and provide smooth project management by handling project communication, documentation, council applications, approvals and private certification. We pride ourselves in customer service and would very much like to be part of your next project, please feel free to get in touch to discuss your requirements.

High quality steel structures

COLA structures offer the best in aesthetic style and durable functionality. We offer a great range of designs. Weathersafe can create tailored design solutions that can't be matched anywhere else on the SA market. Built to exceed industry standards, Weathersafe utilise excellent materials and offer reliability for even the largest projects.

Match your project needs

Whether it is court size or roofline options, our team looks at all the variables to come up with a completely customised and unique solution that you will love. We understand the importance of speaking with our clients, being onsite and having the needs of your students and school at the forefront of the project.

Design and Engineering

Our in house designers, engineers and draftsmen will provide 3D CAD drawings and renders of your project to help you visualise the end result. We use state of the art software to ensure the structural integrity of all designs and to provide you with the most accurate up front quotation.

Manufacturing process

Weathersafe proudly manufacture our structures locally. We work with a range of highly qualified and respected suppliers who are dedicated to work with us ensuring our products meet and exceed Australian standards.

Project management

Our highly experienced team will manage your project at every stage. This includes design, drafting, engineering, council approvals, manufacture, compliance, installation and site clean up, ensuring a hassle-free process. On site compliance We take safety very seriously and believe that we are the most compliant in our industry. We have complete documentation available and are accredited with Spotless, DPTI, LGA and DECS. All relevant staff have necessary police, DCSI and Catholic School clearances and carry all required licences and tickets required for safe and compliant installation.
